

AI Research & Insights Agent

Research Any Topic → Analyze Multiple Sources → Deliver a Professional AI Report

Overview

The AI Research & Insights Agent is an intelligent n8n workflow that automatically researches any topic from the web, analyzes multiple trusted sources using AI, and delivers a professional research report directly to the user's inbox. Built using DuckDuckGo, Jina AI Reader, LLMs, Gmail, and n8n.

Features

- DuckDuckGo web search
- Jina AI Reader article extraction
- Content optimization for AI context limits
- AI-powered research synthesis
- Executive Summary
- Key Insights
- Statistics
- Opportunities
- Risks & Challenges
- Future Trends
- Confidence Score
- HTML Email Delivery

Workflow Architecture

```
graph TD; A[Receive Research Request] --> B[Prepare Request]; B --> C[DuckDuckGo Search]; C --> D[Parse Search Results]; D --> E[Loop Through Search Results]; E --> F[Jina AI Reader]; F --> G[Optimize Article Content]; G --> H[Aggregate Research]; H --> I[AI Research Analyst]; I --> J[Generate HTML Report]; J --> K[Send Research Report (Gmail)]
```

Inputs

topic (String)
email (String)

Output

Professional HTML email containing:

- Executive Summary
- Key Insights
- Statistics
- Opportunities
- Risks
- Future Trends
- Conclusion
- Sources
- Confidence Score

Tech Stack

n8n • DuckDuckGo • Jina AI Reader • OpenAI/Gemini • Gmail • JavaScript • HTML Email

Setup Instructions

1. Import the workflow into n8n.
2. Configure OpenAI/Gemini credentials.
3. Configure Gmail OAuth.
4. Update the Webhook URL.
5. Execute the workflow.

Use Cases

- Market Research
- Competitor Analysis
- Healthcare Research
- Technology Research
- Academic Research
- Business Intelligence

Phase-2 Roadmap

- PDF Report Generation
- Charts & Visualizations
- Scheduled Reports
- Research Dashboard
- Notion & Slack Integration

Notes

Uses free DuckDuckGo Search and Jina AI Reader. Article content is optimized before AI processing to prevent context-limit issues. Duplicate sources and insights are removed automatically.
