

AI Cold Email Personalization Engine

User Manual

Welcome

Thank you for using the **AI Cold Email Personalization Engine**.

This workflow helps businesses automate personalized cold email outreach by combining website research, artificial intelligence, and email automation into a single workflow.

No manual research is required.

Simply provide your lead information and let the workflow handle the rest.

What This Workflow Does

The workflow automatically:

- ✓ Receives lead information
 - ✓ Researches the company website
 - ✓ Understands the business using AI
 - ✓ Generates a personalized email subject
 - ✓ Writes a customized cold email
 - ✓ Sends the email through Gmail
 - ✓ Stores business insights in Google Sheets
 - ✓ Automatically switches to a fallback email if no website is available
-

Workflow Overview

Lead Information

Before You Start

Make sure the following services are connected inside n8n.

Required Credentials

- OpenAI
- Gmail
- Google Sheets
- Apify

Without these credentials the workflow cannot complete successfully.

Input Requirements

Each request should contain the following information.

Field	Required	Description
Name	✓	Lead's name
Email	✓	Lead email address
Company	✓	Company name
Website	Optional	Company website

Example

```
{
  "name": "John Doe",
  "email": "john@example.com",
```

```
"company": "Example Technologies",  
"website": "https://example.com"  
}
```

How To Use

Step 1

Open your application or trigger the webhook.

Submit the lead information.

Step 2

The workflow checks whether a company website exists.

If Website Exists

The workflow will

- Scrape website content
 - Analyze the business
 - Create a personalized email
-

If Website Does Not Exist

The workflow skips website research and generates a professional cold email using only the lead information.

No action is required.

Step 3

Wait while AI analyzes the company.

The workflow automatically identifies

- Business summary
- Industry
- Services
- Target audience
- Business challenges
- Personalization opportunities

Step 4

AI generates

- Personalized Subject
- Personalized Email

No manual editing is required.

Step 5

The workflow sends the email using Gmail.

Step 6

Business insights are automatically stored in Google Sheets for future reference.

Google Sheets Output

Each execution creates a new record containing

- Timestamp
 - Lead Name
 - Email
 - Company
 - Website
 - Industry
 - Business Summary
 - Services
 - Target Audience
 - Pain Points
 - Unique Selling Points
 - Brand Tone
 - Personalization Hook
-

Email Personalization

The AI creates unique emails using

- Company research
- Business summary
- Services

- Pain points
- Brand tone
- Personalization hook

Every email is different.

Fallback Mode

If a company website is unavailable

The workflow automatically

- Skips website scraping
- Skips AI business research
- Creates a professional cold email
- Sends the email

No additional setup is required.

Best Practices

- ✓ Always provide a valid business website whenever possible.
 - ✓ Verify the lead email address before sending.
 - ✓ Review AI-generated emails for high-value prospects.
 - ✓ Keep your OpenAI API key active.
 - ✓ Monitor Google Sheets regularly.
 - ✓ Test the workflow before production deployment.
-

Common Issues

Website cannot be scraped

Possible causes

- Website is unavailable
- Website blocks scraping
- Invalid URL

Solution

The workflow automatically uses the fallback email flow.

Gmail authentication failed

Reconnect your Gmail credentials inside n8n.

OpenAI quota exceeded

Check your API usage and billing.

Google Sheets not updating

Verify

- Spreadsheet permissions
 - OAuth credentials
 - Sheet name
-

Security Recommendations

Do not expose

- OpenAI API Keys
- Gmail Credentials
- Apify Tokens

Use n8n Credentials for all authentication.

Recommended Use Cases

This workflow is ideal for

- Sales Teams
 - Marketing Agencies
 - SaaS Companies
 - Freelancers
 - Consultants
 - Recruiters
 - Lead Generation Agencies
 - AI Automation Agencies
-

Future Upgrades

Optional enhancements include

- CRM Integration
 - LinkedIn Research
 - Company News Analysis
 - AI Lead Scoring
 - Follow-up Email Sequences
 - Email Open Tracking
 - Reply Tracking
 - Analytics Dashboard
-

Support

If you customize this workflow

Always test with sample leads before sending live emails.

Review AI-generated content periodically to ensure it aligns with your brand voice and outreach strategy.

Conclusion

The AI Cold Email Personalization Engine enables businesses to automate outreach while maintaining a personalized, professional approach.

By combining website research, AI analysis, and email automation, the workflow helps reduce manual effort, improve efficiency, and scale cold outreach campaigns with confidence.
